

JUNE 2013 SCFIRS REPORT

Fire Chiefs,

This month's report includes data from January to June, representing half the calendar year. We have added a page (p. 5) that compares response times by hour depending on the department staffing type (paid, combination, volunteer). This is meant to allow you to see how comparable departments are responding during peak, business, or off hours.

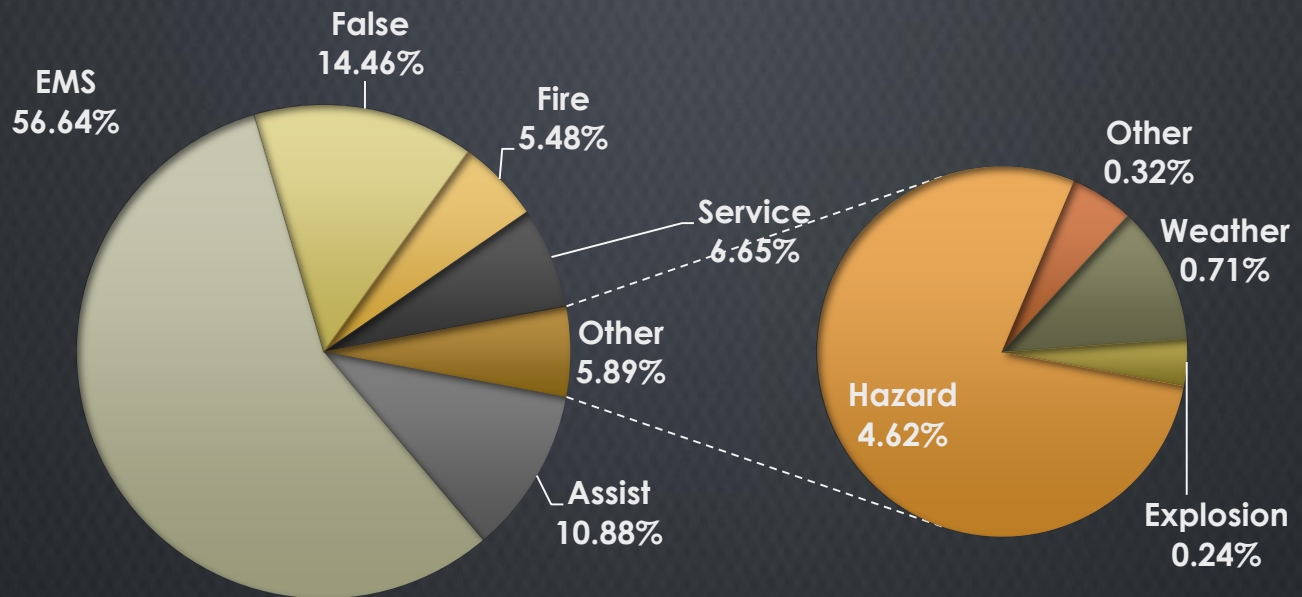

Additionally, there is a new ranking based on Property/Contents Saved in fires. This data is gathered by subtracting the dollar loss from the pre-incident property value. As a reminder, the pre-incident and damage amounts are required for all fires. These are estimates that are not recognized in court and neither departments nor staff can be held liable for them. With that in mind, it is highly recommended that departments use these fields frequently. This property/contents saved can be taken back to local governing agencies and used as a measure of the value of the fire protection services you provide.

Thank you for your continued participation,

- ❖ Property/Contents Saved is calculated by subtracting the Property/Contents Loss from the Pre-Incident Value.
- ❖ These values are estimates only and are intended only to provide an idea of how much damage the fire caused and what it would cost to replace the damaged materials. These estimates are not recognized in court as official appraisals of value.
- ❖ The Property and Contents fields should be completed for every fire incident type (100 series).
